DevOps & Tools	Docker, CI/CD pipeline (using github actions), AWS/Cloud Deployment
Others	Git

Work Experience

> Software Engineer

(Dec-2021 - Dec-2024)

Uforia Infotech Solutions, Islamabad

Description:

As a Software Developer at Uforia Infotech Solutions I leveraged my expertise in HTML, CSS, JavaScript, React.js, and Node.js to build and maintain web applications.

My responsibilities included:

- Developed responsive web applications using React.js and modern JavaScript
- Worked with backend technologies including Node.js and Express.js
- Integrated with MongoDB databases and RESTful APIs
- Participated in code reviews and followed agile development methodologies
- Contributed to the improvement of development processes and workflows

> **Software Engineer**

(Dec-2024 - Present)

SIGNPOST TECH INC.

Description:

As a Software Developer at SIGNPOST TECH INC. I leveraged my expertise in Next.js, Express.js, HTML5 Canvas, JavaScript, React.js to build and maintain web applications.

My responsibilities included:

- Developing and maintaining full-stack web applications using React.js, Next.js, and TypeScript
- Building interactive canvas-based applications using HTML5 Canvas and Fabric.js
- Implementing responsive designs and modern UI/UX principles
- Collaborating with cross-functional teams to deliver high-quality products
- Optimizing application performance and ensuring scalability

Projects:

- **Fence Estimation Application:** A comprehensive business management platform for fencing contractors that streamlines the entire customer journey from initial property assessment to final invoicing. The application integrates Google Maps for location services, advanced canvas-based fence design tools, and automated PDF generation for quotes and invoices.
- **Football Coaching App:** Useful for football club coaches to train players and teach them strategies. **(Currently used by Villarreal CF a Spanish football club)**
- **Atlas Memorial:** A compassionate digital platform that enables users to design beautiful memorial tributes for their loved ones. The application features advanced design tools powered by HTML5 Canvas and Fabric.js, allowing users to create personalized memories and professional business/social media content.
- **Collage Designer:** It's a simple React js application that lets the user combine their photos in the form of collage with a flexibility to create several layouts.

Tools / Technologies: Next js, React js, Redux, Fabric js, Tailwind, Material UI, Bootstrap, Node js, FFmpeg, Playwright, Puppeteer

Education

BS Computer Science

University of Central Punjab (Rawalpindi Campus)

2017-2021

Area of Interest

- Software Development.
